

Environmental Compliance

Meeting operational requirements, fulfilling environmental responsibilities and promoting environmental stewardship

Our environmental engineers and compliance specialists have extensive experience providing environmental, health and safety engineering and consulting services to industrial, commercial and governmental organizations. Michael Baker International, a full-service, national engineering firm with expertise in multi-media compliance support provides the experience and know-how to ensure your facility operates in an environmentally sound manner, in compliance with all applicable regulations and in accordance with your organizational goals and policies.

Michael Baker delivers cost-effective solutions by partnering with our clients to streamline management of data among facility regulatory programs. This approach positively impacts the bottom line, while reducing risk and other future environmental liabilities.
