

Community Planning

Michael Baker International's expert planners possess a careful understanding of the enormous impacts that planning decisions have on the environment and quality of life. With this in mind, we skillfully guide community planning decisions, while developing safe, sustainable communities and institutions. Our approach to planning is comprehensive yet simple, and is tailored to each locale to achieve a realistic vision of the community.

Creating Sustainable Communities Through Comprehensive Planning

Planning is a process to determine the future vision and goals of a community for its physical development and corresponding functions. The resulting plan can serve at the regional, community, district, neighborhood, corridor or site level. At Michael Baker, we focus on people and places to improve communities, creating more sustainable, equitable, healthy, efficient and attractive places. Our interdisciplinary teams include planners, engineers, urban designers, and building and landscape architects who understand a challenging vision and work together to achieve it at an affordable price.
