

Environmental Planning

Michael Baker International understands the importance of proactive environmental planning, and our skilled engineers offer a wide range of services to balance ecological considerations with community development and economic demands.

Increasing Sustainability Components Across All Project Aspects

Our team includes in-house experts in botany, wetlands, wildlife science, historic resources, air quality, noise, environmental justice and more. With services ranging from project specific NEPA and CEQA studies to habitat restoration plans, we understand the importance of proactive environmental planning to ensure that urban development and major infrastructure investments proceed in a sustainable and environmentally sound way.
